15

This reference list has been compiled for anyone who wishes to augment his knowledge of microscopy as it has been applied to air pollution problems.

The bibliography is divided into two categories: (1) general reference books and pamphlets for the review of basic material and for the development of ideas potentially applicable to air borne particulates and (2) journal and symposia papers dealing with microscopy in various areas of interest, but primarily applicable to air pollution.

OPTICAL MICROSCOPY AS APPLIED TO AIR POLLUTION STUDIES - A REFERENCE LIST

SECTION I. Reference Books and Pamphlets

Air particulates No. 1. J. S. Ferguson, R. T. Cope, and E. F. McFarren. Analytical Reference Services. Study No. 22. PHS. Publ. No. 999-AP-22. Public Health Service, Cincinnati, Ohio. 1966. 75 pp.

An atlas of airborne pollen grains. H. A. Hyde and K. F. Adams. Macmillan Co. New York, N. Y. 1958. 111 pp.

ASTM standards on methods of atmospheric sampling. D 2009 - 62 T. American Society for Testing of Materials. 1916 Race Street. Philadelphia 5, Pa. 146 pp.

The analytical chemistry of industrial poisons, hazards, and solvents. M. B. Jacobs. Interscience Publishers, Inc. New York, N. Y. Vol. 1. 1949. 783 pp.

The Barker index of crystals. N. M. Porter and R. C. Spiller. 3d ed. Hafner Publishing Co., Inc. New York, N. Y. 1959.

Dyed pollens and other spores as tracers in dispersion and deposition studies. G. S. Raynor, L. A. Cohen, J. V. Hayes, and E. C. Ogden. Brookhaven National Laboratories. BNL-10031. 9 pp.

Encyclopedia of instrumentation for industrial hygiene. C. D. Yaffee, D. H. Byers, and A. D. Hosey, eds. University of Michigan, Institute of Industrial Health, Ann Arbor, Mich. 1956. 1243 pp.

Encyclopedia of microscopy. G. L. Clark. Reinhold Publishing Corp. New York, N. Y. 1961. 698 pp.

Fiber microscopy. A. N. J. Heyn. Interscience Publishers, Inc. New York, N. Y. 1954. 420 pp.

Fiber microscopy. J. L. Steves. D. Van Nostrand Co., Inc. New York, N. Y. 1958. 286 pp.

Fine particle measurement: size, surface, and pore volume. C. Orr and J. M. Dalla Valle. Macmillan Co. New York, N. Y. 1959. 353 pp.

Fluorescence analysis in ultraviolet light. J. A. Radley and J. Grant. 2d ed. D. Van Nostrand Co., Inc. New York, N. Y. 1935. 560 pp.

Fluorescent particles' tracer counting manual. 163-2. Prepared by Metronics Associates, Inc., Palo Alto, Calif., for the United States Weather Bureau, Department of Commerce. Aug. 1964. 31 pp.

Fusion methods in chemical microscopy: a textbook and laboratory manual. W. C. McCrone. Interscience Publishers, Inc. New York, N. Y. 1957. 326 pp.

Handbook of chemical microscopy. W. Mason and E. M. Chamot. 3d ed. John Wiley and Sons, Inc. New York, N. Y. Vol. I, 502 pp. Vol. II, 438 pp. 1958.

The identification of atmospheric dust by use of the microscope. E. M. Hamilton and W. D. Jarvis. Central Electricity Generating Board, Research and Development Dept. London, England. Mar. 1963. 32 pp.

Identification of materials via physical properties chemical tests and microscopy. A. A. Benedetti-Pichler. Springer-Verlag, Inc. New York, N. Y. 1964. 484 pp.

Industrial dust. P. Drinker and T. Hatch. 2d ed. McGraw-Hill Book Co. New York, N. Y. 1954. 401 pp.

Introduction to the study of minerals. A. F. Rogers. 3d ed. McGraw-Hill Book Co. New York, N. Y. 1937. 626 pp.

Manual of clinical allergy. J. M. Sheldon, R. G. Lovell, and K. P. Mathews. W. B. Saunders Co Philadelphia, Pa. 1953. 413 pp.

Methods of particle size and analysis. R. P. Loveland. In: symposium on light microscopy. ASTM Spec. Tech. Publ. 143. 1952. pp. 94-122. See pp. 57-86 ASTM Spec. Tech. Publ. 234. 1959.

The microbiology of the atmosphere. P. H. Gregory. Interscience Publishers, Inc. New York, N. Y. 1961. 251 pp.

Microscopic characterization of artificial minerals. A. N. Winchell. John Wiley and Sons, Inc. New York, N. Y. 1931. 403 pp.

The microscopic determination of the non-opaque minerals. 2d ed. United States Government Printing Office. Washington, D. C. 1934.

Microscopic determination of the ore minerals. M. N. Short. Geological Survey Bulletin #914. U. S. Geological Survey. 2d ed. 1948. 322 pp.

Microscopy for chemists. H. F. Schaeffer. D Van Nostrand Co., Inc. New York, N. Y. 1953. 264 pp.

Modern methods of microscopy. (A series of papers reprinted from Research.) A. E. J. Vickers, ed. Butterworth and Co. London, England. 1956. 114 pp.

Optical crystallography. E. E. Wahlstrom. 3d ed. John Wiley and Sons, Inc. New York, N. Y. 1960. 356 pp.

Ore microscopy. E. N. Cameron. John Wiley and Sons, Inc. New York, N. Y. 1961. 312 pp.

Particle atlas. W. C. McCrone, Jr., R. G. Draftz, and J. G. Delli. Ann Arbor Science Publishers. Ann Arbor, Michigan. 1967. 406 pp.

Particle size: measurement, interpretation, and application. R. R. Irani and C. F. Callis. John Wiley and Sons, Inc. New York, N. Y. 1959. 165 pp.

Photography through the microscope. Eastman Kodak Company. Rochester, N. Y. 1962.

Photomicrography. R. M. Allen. 2d ed. D. Van Nostrand Co., Inc. New York, N. Y. 1958. 441 pp.

Photomicrography, R. Schenk, and G. Kistler. Chapman and Hall Ltd. London, England. 1962. 132 pp.

Photomicrography. C. P. Shillaber. John Wiley and Sons, Inc. New York, N. Y. 1944. 773 pp.

Pollen counts and air pollution. Proceedings of New York Allergy Society. S. S. Sack, ed. New York, N. Y. Dec. 1964. Also published in New York State Journal of Medicine. July 15, 1965. 15 pp.

Pollen grains. R. P. Wodehouse. McGraw-Hill Book Co. New York, N. Y. 1935. 574 pp.

Practical optical crystallography. N. H. Hartshorne and A. Stuart. American Elsevier Publishing Co. New York, N.Y. 1964. 315 pp.

Practical refractometry. R. M. Allen. 2d ed. R. P. Cargille Laboratories, Inc. New York, N. Y. 1962. 43 pp.

Practical use of the microscope. G. Needham. Charles C. Thomas. Springfield, Ill. 1958. 493 pp.

Progress in microscopy. M. Francon. Harper and Row Publishers. El-Hi Div., Evanston, Ill. 1966.

Quantitative ultramicroanalysis. P. L. Kirk. John Wiley and Sons, Inc. New York, N. Y. 1950. 310 pp.

Staining of clay minerals as a tapid means of identification in natural and beneficiated products. R. I. 3522. U. S. Bureau of Mines, Department of Interior. Washington, D. C. 1940. 21 pp.

Staining procedures. Biological Stain Commission. 2d ed. Williams and Wilkins Co. Baltimore, Md. 1960. 289 pp.

Tables for microscopic identification of inorganic salts. W. H. Fry. U. S. Department of Agriculture Bull. No. 1108. 1922.

SECTION II. Journal Articles and Symposia Proceedings

Airborne algae and their allergenicity. Part I. Air sampling and delineation of the problem. J. P. McGovren, J. P. McElhenney, and R. Brown. Ann. Allergy. 23:47-50. Jan. 1965.

Air pollution and particle size toxicity problem - II. H. E. Stokinger and S. Laskin. Nucleonics. 6:15-31. 1950.

Analysis of micron-sized particles. J. P. Lodge. Anal. Chem. 26:1829-31. 1954.

Analysis of micron sized particles - determination of sulfuric acid aerosol. J. P. Lodge, J. S. Ferguson, and B. R. Havlik. Anal. Chem. 32:1206. Aug. 1960.

The anatomical effects of air pollution on plants. R. A. Bobrov. In: Proceedings of the Second National Air Pollution Symposium Pasadena, Calif. May 5-6, 1952. Sponsored by SRI and others. 1952. pp. 129-34.

Application of dispersion staining to microscopic identification of settled dust. D. G. Grabar. JAPCA. 12:560-66. Dec. 1962.

Application of rubber in the quantitative determination of ozone. C. E. Bradley and A. J. Haagen-Smit. Rubber Chem. Technol. 22:750-55. 1951

Atmospheric dust evaluation. M. B. Jacobs. In: The chemistry of air pollutants. Interscience Publishers, Inc. New York, N. Y. 1960. pp. 70-90.

An automatic volumetric spore trap. J. M. Hirst. Ann. Appl. Biol. 39:257-60. 1959.

Calcium sulfate content of urban air. L. Sumi, A. Corkery, and J. L. Monkman. In: Atmospheric chemistry of chlorine and sulfur conpounds. Proceedings of symposium. Cincinnati, Ohio. Nov. 4-6, 1957. National Research Council Publ. No. 652. Am. Geophys. Union Mono. No. 3. 1959. pp. 69-79.

Chemical identification of halide and sulfate in submicron particles. J. P. Lodge, Jr., and B. J. Tufts. Anal. Chem. 30:300-303. Feb. 1958.

Chemical identification by means of polarized light microscopy. P. W. West. Chemist-Analyst. 43:46-50, 56, 77-81, 109-112. 1954.

Chemical methods of identification of individual particulates. J. P. Lodge. Nubila. 2:58-66. 1959.

Comparison of x-ray diffraction, chemical (phosphoric acid) and dispersion staining methods for the determination of quartz in dust. G. H. Edwards. Am. Ind. Hyg. Assoc. J. 26:532-36. Sept-Oct. 1965.

Construction and use of the intermittent rotoslide pollen sampler. E. C. Ogden, G. S. Raynor, and J. M. Vormevik. Distributed by the Pollen and Mold Committee. American Academy of Allergy. Milwaukee, Wis. 8 pp.

A Continuous spore sampler. S. M. Pady. Phytopathology. 49:757-60. Nov. 1959.

Controlling factors in identification of microscopic chloride particles with sensitized gelatine films. F. D. Pidgeon. Anal. Chem. 27:704-08. 1954.

Cork formation in table beet leaves (Beta vulgaris) in response to smog. R. A. Bobrov. In: Proceedings of the Third National Air Pollution Symposium. Pasadena, Calif. Apr. 18-20, 1955. Sponsored by SRI and others. 199-206 pp.

Determination and measurement of particles in city atmospheres. M. B. Jacobs, M. M. Braver, C. Theophil, and S. Hochheiser. Am. J. Public Health. 47:1430-33. Nov. 1957.

Determination of composition of air-borne particulate material. R. D. Cadle. Anal. Chem. 23:196-98. 1951.

Determination of free silica by dispersion staining microscopical methods. G. C. Crossman. Am. Ind. Hyg. Assoc. Quart. 12:117-120. 1951.

Determination of particulate lead content in air-results of tests in city traffic. B. Tufts. Anal. Chem. 31:238-41. Feb. 1959.

Developments in the techniques of particle size analysis by microscopeic examination. G. V. Faris. J. Roy. Microscope. Soc. 71:209-22. 1951.

A development study of the leaves of Nicotiana glutinosa as related to their smog-sensitivity. R. B. Glater, R. B. Solberg, and F. M. Scott. Am. J. Botany. 49:954-70. Oct. 1962.

Dispersion staining. Part I. K. M. Brown and W. C. McCrone. Microscope and Crystal Front. 13 (11):311-22. Mar. Apr. 1963.

Dispersion staining. Part II. K. M. Brown, W. C. McCrone, R. Kuhn, and L. Forlini. Microscope and Crystal Front. 14(2): 39-54. Sept.-Oct. 1963.

Dust counting variability. R. G. Edwards, Jr., C. H. Powell, and M. A. Kendrick. Am. Ind. Hyg. Assoc. J. 27:546-54. Nov.-Dec. 1966.

Effects of air pollution on exposed cotton fabrics. R. J. Brysson, J. B. Upham, B. J. Trask, and S. G. Booras. Presented at 59th Annual Meeting of the Air Pollution Control Association. San Francisco, Calif. June 20-24, 1966.

The effect of dust particle orientation on particle size determined by microscopic techniques. M. Corn. Am. Ind. Hyg. Assoc. J. 25:1-7. Jan. -Feb. 1964.

The effect of smog on the anatomy of oat leaves. R. A. Bobrov. Phytopathology. 42:558-63. 1952.

Electrostatic aerosol sampler for light and electron microscopy. B. Y. H. Liu, K. T. Whitby, and H. H. S Yu. Rev. Scientific Instruments. 38:100-02. Jan. 1967.

Experience with phase microscopy. M. Sheinbaum. Am. Ind. Hyg. Assoc. J. 21:518-521. 1960.

A fluorescent atmospheric tracer technique for mesometeorological research. W. A. Perkins, P. A. Leighton, S. W. Grinnell, and F. K. Webster. In: Proceedings of the Second National Air Pollution Symposium. Pasadena, Calif. May 5-6, 1952. Sponsored by SRI and others. pp. 42-26.

Gas chamber microapparatus in identification of microscopic chloride particles with sensitized gelatine films. J. L. Monkman. Anal. Chem. 27:704-08. 1955.

High-efficiency pollen samplers for use in clinical allergy. J. B. Harrington, G. C. Gill, and B. R. Warr. J. Allergy. 30:357-75. July-Aug. 1959.

Identification of particles in Los Angeles Smog by optical and electron microscopy. R. D. Cadle, S. Rubin, C. I. Glassbrook, and P. L. Magill. Arch. Ind. Hyg. Occ. Med. 2:698-715. Dec. 1950.

The identification of pollen grains using fluorescence microscopy. H. E. Ratcliff, T. R. Turner, and W. H. Grigg. J. Allergy. 34:116-18. Mar. -Apr. 1963.

The importance of thinking small. W. C. McCrone and R. Draftz. Heating, Piping, and Air Conditioning. 38:126-133. Jan. 1966.

Interstate air pollution surveillance program effects network. G. A. Jutze, R. L. Harris, Jr., and M. Georgevich. Presented at 59th Annual Meeting of the Air Pollution Control Association. San Francisco, Calif. June 20-24, 1966.

Kansas aeromycology XII: Materials, methods, and general results of diurnal studies. 1959-60. S. M. Pady, C. L. Kramer, and B. J. Wiley. Mycologia. 54:168-80. Mar.-Apr. 1962.

The leaf structure of Poa annua with observations on its smog sensitivity in Los Angeles County. R. A. Bobrov. Am. J. Botany. 42:467-74. May 1955.

Life processes of plants as affected by air pollution. H. H. Hull and F. W. Went. In: Proceedings of the Second National Air Pollution Symposium. Pasadena, Calif. May 5-6, 1952. Sponsored by SRI and others. pp. 122-28.

Measuring the environment for a bronchial asthma study. R. A. Mill, R. A. Hollenbeck, and H. J. Paulus. Am. Ind. Hyg. Assoc. J. 26:510-519. Sept.-Oct. 1965.

Metabolic effects of chronic ozone exposure on rats. J. A. Hathaway and R. C. Terrill. Amer. Ind. Hyg. Assn. J. 23:392-95. Sept.-Oct. 1962.

Meteorological conditions affecting the dispersal of airborne algae and protozoa. H. E. Schlichting, Jr. Lloydia. 27:64-78. 1964.

A method for determining aero-allergen concentration with the molecular filter membrane. S. Cryst, C. W. Gurney, and W. Hansen. J. Lab. Clin. Med. 46:471-75. 1955.

Methods of particle size analysis. R. P. Loveland. Symposium on light microscopy. ASTM Spec. Tech. Publ. 143. pp 94-122. Also ASTM Spec. Tech. Publ. 234. pp 57-86. 1959.

Microdetermination of sulfuric acid aerosol. E. R. Gerhard, and H. F. Johnstone. Anal. Chem. 27:702-03.

Microscopic dust: sampling methods can affect size estimations. A. J. Cruise. Engineering (London). 183:366-68. 1957.

The microscopic identification of atmospheric particulates. W. C. McCrone and M. A. Salzenstein. JAPCA. 12:195-97. Apr. 1962.

Microscopic identification of toxic dusts. G. C. Crossman. Occupational Health Rev. 16(3):3-7. 1964.

Micrurgic identification of chloride and sulfate. R. D. Cadle. In: Atmospheric chemistry of chlorine and sulfur compounds. Proceedings of symposium Cincinnati, Ohio. Nov. 4-6, 1957. National Research Council Publ. No. 652. Am. Geophys. Union, Mono. No. 3. 1959. pp. 18-21.

Morphological and microscopical changes in tobacco, pinto bean, and petunia leaves exposed to irradiated auto exaust. I. J. Hindawi, J. A. Dunning, and C. S. Brandt. Phytopathology. 55:27-30. Jan. 1965.

Morphological identification of some organic acids as the sodium salts. B. R. Havlik, L. M. Marshall, and J. P. Lodge. J. Chromatog. 2:620-25. 1959.

New developments in phase and dispersion staining microscopy for the examination of dust samples. G. Crossman. Am. Ind. Hyg. Assoc. J. 25:25-27. Jan.-Feb. 1964.

October 1963 New Orleans asthma study. P. A. Kenline. Arch. Environ. Health. 12:295-304. Mar. 1966.

Polarized light microscopy. P. W. West. Chemist-Analyst. 35:4-8. 1946.

Pollen counts and air pollution. Proceeding of New York Allergy Society. Dec. 1964. S. S. Sack, ed. Published by New York State Journal of Medicine. New York, N. Y. July 15, 1965. 15 pp.

Some effects of hydrogen fluoride on the internal structure of Pinus ponderosa needles. R. A. Solberg, D. F. Adams, and H. A. Ferchau. In: Proceedings of the Third National Air Pollution Symposium. Pasadena, Calif. Apr. 18-20, 1955. Sponsored by SRI and others. pp. 164-76.

Some techniques for sampling and identifying particulate matter in the air. W. D. Crozier and B. K. Seely. In: Proceedings of the First National Air Pollution Symposium. Pasadena, Calif. Nov. 10-11, 1949. Sponsored by SRI and others. pp. 45-49.

Study of sea salt particles over Puerto Rico. J. P. Lodge, Jr. J. Meteorol. 12(5):493-99. Oct. 1955.

Tables for microscopic identification of inorganic salts. W. H. Fry. United States Department of Agriculture Bull. No. 1103. 1922.

A technique for counting and sizing dust samples with a microprojector. F. A. Anderson. Am. Ind. Hyg. Assoc. J. 23:330-36. July-Aug. 1962.

Techniques. G. C. Crossman. Focus (Bausch and Lomb, Inc.) 33:27-30. 1962.

Techniques for the chemical identification of micron and submicron particles. J. P. Lodge, Jr., and B. J. Tufts. Tellus. 8:184-94. 1956.

Travels of airborne pollen. E. C. Ogden, G. S. Raynor, and J. V. Hayes. Progress reports No. 1-7. 1960-66. New York State Museum and Science Service. Albany, N. Y.

Some applications of microscopy to air pollution. J. S. Ferguson and E. G. Sheridan. JAPCA. 11:669-72. Dec. 1966.

The use of Becke line colors in refractive index determination. Am. Mineralogist. 33:612-18. 1948.

Use of plants as biological indicators of smog in the air of Los Angeles County. R. A. Bobrov. Science. 121:510-11. 1955.

Use of sticky paper in an air pollution monitoring program. C. W. Gruber and G. A. Juisz. JAPCA. 7:115-17. Feb. 1957.

The value of phase microscopy for the examination of particulate matter collected on membrane filters. G. Crossman. Am. Ind. Hyg. Assoc. J. 20:190. June 1959.

Viable species of algae and protozoa in the atmosphere. H. E. Schlichting, Jr. Lloydia. 24:81-88. June 1961.
